MOHAMMED FUZAIL RAYYAN H

Software Developer — Full Stack

Chennai, Tamil Nadu, India | md.fuzailrayyan@gmail.com | 8807101795 | Portfolio | LinkedIn

SUMMARY

Full Stack Developer with 3+ years of experience across the MERN stack (MongoDB, Express.js, React.js, Node.js) and React Native, building scalable web and mobile applications. Recent focus on AI-driven features — Retrieval-Augmented Generation (RAG) with OpenAI, automated meeting transcription, and multi-role healthcare workflows. Strong track record of shipping production features end-to-end, from API design to responsive, cross-platform UI. Seeking a full stack or mobile engineering role where I can apply this experience to build high-impact, AI-integrated products.

SKILLS

- Languages: JavaScript (ES6+), HTML5, CSS3, TypeScript (basic)
- Frameworks & Libraries: React.js, React Native, Node.js, Express.js, Bootstrap, Tailwind CSS
- Database: MongoDB
- AI / ML Integration: OpenAI API, Retrieval-Augmented Generation (RAG), AI-based transcription pipelines
- Cloud & Integrations: Google Drive API, RESTful APIs, JWT Authentication
- Tools & Practices: Git, VS Code, React Hooks, React Context API, Agile methodology, Jest, React DevTools

WORK EXPERIENCE

Software Developer — Full Stack — SRM Technologies

Sep 2025 – Present

- Built a full-stack AI-powered web application featuring automated meeting transcription and intelligent, context-aware query answering using Retrieval-Augmented Generation (RAG) with the OpenAI API.
- Developed "MedBot", a multi-role healthcare module supporting Doctor, Patient, Pharmacy, and Lab workflows, enabling coordinated, role-based access within the platform.
- Designed and built a middleware service to fetch recorded meeting videos from Google Drive and integrate them into the "Smart Meet" application, automating an end-to-end manual video-retrieval process.
- Contributed to both the React.js web front end and a React Native mobile app for the same platform, keeping feature parity and UX consistent across web and mobile.
- Built and consumed Node.js/Express APIs powering AI features, working closely with backend and product teams in an Agile environment.

Software Developer — Full Stack — Codeup Global Solutions Pvt Ltd.

Mar 2023 – Feb 2025

- Contributed to Xakal, a product-based HR management platform for SMEs with integrated social-media-style features, built on the MERN stack for high performance and scalability.
- Built reusable React.js components and ensured cross-browser, mobile-first responsiveness using HTML5, CSS3, and JavaScript.
- Collaborated with UI/UX teams to design responsive interfaces that improved engagement and accessibility across desktop and mobile.
- Integrated backend APIs with Node.js and Express.js for seamless data flow and performance tracking.
- Developed an admin dashboard for managing product inventories, customer details, and order tracking using React.js and CSS Grid/Flexbox.
- Optimized the codebase using modern ES6+ features (Promises, Async/Await, Arrow Functions) and validated functionality with Jest and React DevTools.
- Managed a version-controlled development workflow using Git, following Agile methodology for consistent milestone delivery.

PROJECTS

E-Commerce Website — Self-Driven Project

Dec 2022 – Mar 2023

- Built a full-featured e-commerce platform on the MERN stack with product browsing, Stripe payment integration, order management, and JWT-based authentication.

- Designed a mobile-first, responsive UI with HTML5, CSS3, JavaScript, and Bootstrap; used React Hooks and Context API for state management.

Drowsiness Detection (ML) — Final Year Project — Driver Face Behaviour Analysis *Dec 2019 – Mar 2020*

- Built a real-time drowsiness detection system using Python and OpenCV, analysing eye-blink rate and facial expressions to flag driver fatigue.
- Used Haar Cascades for face detection and triggered real-time alerts to help prevent fatigue-related accidents.

COURSES & CERTIFICATIONS

- Machine Learning and Artificial Intelligence — Besant Technologies, Chennai (Sep 2019 – Feb 2020): Python, data science techniques, and ML algorithms.
- Full Stack Developer (Apprenticeship) — Fabevy Technologies (Mar 2020 – May 2020): Single-page applications and e-commerce platforms using React.js, HTML, CSS, JavaScript.
- ERP and Web Development — Self-Driven (Jul 2017 – Aug 2017): HTML, CSS, JavaScript, SQL, Visual Studio Code.

EDUCATION

Bachelor of Engineering, Computer Science and Engineering
Aalim Muhammed Salegh College of Engineering, Chennai | Aug 2016 – May 2020

Higher Secondary Certificate, Mathematics with Computer Science
Don Bosco Matric Higher Secondary School, Chennai | Jun 2015 – Jun 2016
