SUMMARY

Dynamic Full Stack Developer with hands-on experience in MERN Stack (MongoDB, Express.js, React.js, Node.js). Proficient in JavaScript, React JS, CSS, HTML, and Node.js to build responsive and scalable web applications. Adept at collaborating in agile environments to deliver user-friendly, high-performance web solutions. Passionate about improving application performance and ensuring an optimal user experience. Seeking an opportunity to leverage my technical expertise and problem-solving skills to contribute to a forward-thinking company's success.

SKILL

Languages: JavaScript, HTML5, CSS3
Frameworks: React.js, Node.js, Express.js, Bootstrap, Tailwind CSS
Database: MongoDB
Tools: Git, Visual Studio Code
Version Control: Git Methodologies: Agile, RESTful APIs
Technologies: JWT, React Hooks, React Context API

WORK EXPERIENCE

Mern Stack Developer, **Mar 2023 - Feb 2025**
Codeup Global Solution Pvt Ltd.

- I was involved in the development of Xakal, a comprehensive HR management platform for SMEs, leveraging the MERN Stack (MongoDB, Express.js, React.js, Node.js) to ensure high performance and scalability.
- I contributed to front-end development using React.js, designing reusable components and ensuring cross-browser compatibility with HTML5, CSS3, and JavaScript to optimize user experience across devices.
- I collaborated with UI/UX teams to create responsive, mobile-first interfaces that improved user engagement and accessibility on both desktop and mobile platforms.
- I was involved in integrating backend APIs using Node.js and Express.js, ensuring seamless data flow and efficient performance tracking across the platform.
- I contributed to optimizing the codebase for performance and scalability by utilizing modern JavaScript ES6+ features such as Promises, Async/Await, and Arrow Functions to streamline asynchronous operations and improve code readability.
- I was involved in conducting unit testing and debugging with React DevTools and Jest, ensuring seamless functionality and a high-quality user interface.
- I contributed to managing a version-controlled development process using Git and followed Agile methodologies to ensure consistent delivery of project milestones and effective collaboration with cross-functional teams.

E-Commerce Website, **Dec 2022 - Mar 2023**
Self-Driven Project

- Developed a fully functional e-commerce platform using the MERN Stack (MongoDB, Express.js, React.js, Node.js) to enable a scalable and responsive user experience.
- Designed a mobile-first, responsive UI using HTML5, CSS3, JavaScript, and Bootstrap, ensuring seamless usability across all devices and screen sizes.
- Implemented core features such as product browsing, payment integration (via Stripe API), order management, and user authentication using JWT (JSON Web Tokens) for secure sessions.
- Optimized front-end performance using React Hooks, and managed application state with React Context API to improve component reusability and maintainability.

- Developed a robust admin dashboard for managing product inventories, customer details, and order tracking using React.js and CSS Grid/Flexbox for efficient layout.

Drowsiness Detection Based on Driver Face Behaviour **Dec 2019 – Mar 2020**
Using Machine Learning (Final Year Project)

- Developed a real-time drowsiness detection system to enhance road safety using Python and OpenCV for real-time facial recognition and behaviour analysis.
- Applied machine learning algorithms to analyse driver behaviour and detect signs of drowsiness based on facial features such as eye blink rate and facial expressions.
- Designed and implemented the system to trigger real-time alerts to prevent accidents caused by driver fatigue, increasing road safety.
- Utilized Haar Cascades for face detection and OpenCV for real-time video processing to ensure accurate detection and response.

COURSE

Machine Learning and Artificial Intelligence **Sep 2019 – Feb 2020**
Besant Technologies, Chennai, Tamil Nadu, India

- Focused on Python programming, data science techniques, and machine learning algorithms.

ERP and Web Development **Jul 2017 – Aug 2017**
Self-Driven

- Gained proficiency in HTML, CSS, JavaScript, SQL, and Microsoft Visual Studio Code for web development.

Full Stack Developer (Apprenticeship) **Mar 2020 - May 2020**
Fabevy Technologies

- Worked on single-page applications (SPA) and e-commerce platforms using React.js, HTML, CSS, and JavaScript.

POSITIVE QUALITIES

Analytical Skills:
Strong ability to analyse issues, make decisions, and develop solutions.
Leadership & Teamwork:
Skilled in collaboration, delegation, and goal setting with experience leading teams.
Project Management:
Proficient in strategic planning, planning, and overseeing the execution of projects.
Creativity & Productivity:
Ability to think creatively while ensuring efficiency and productivity in development tasks.
Technical Proficiency:
Deep knowledge of React.js, HTML5, CSS3, JavaScript, and Node.js

EDUCATION

Bachelor of Engineering (Computer Science and Engineering) **Aug 2016 – May 2020**
Aalim Muhammed Salegh College of Engineering
Chennai, Tamil Nadu, India

Higher Secondary Certificate, Mathematics with Computer Science **Jun 2015 – Jun 2016**
Don Bosco Matric Higher Secondary School Peravallur, Chennai-82

Tamil Nadu, India Secondary School Leaving Certificate, **Jun 2013 – Jun 2014**
Mathematics with Science
Don Bosco Matric Higher Secondary School Peravallur, Chennai-82,
Tamil Nadu, India
